

My name is Scott Wisneski and I'm writing in an effort to show my dissaproval of the NAB's petition 04-160. I have been a subsriber to sattelite radio for over a year now and am very pleased with the services I receive. It is a very good thing to have while driving truck across this country of ours. It is nice to know that there is a service that is convienient to me out here. There is no longer any need to keep switching stations because you start to lose the signal. This satellite radio also provides many services such as traffic,weather,and news. Please let my objection to the petition be heard. Thank You
